## ABOUT WINGIS

WinGIS is a consortium comprised of (8) eight jurisdictions that have collaborated and pooled funds to support the development of a countywide geographic information system (GIS). Winnebago County is the lead agency of the eight-member consortium.

In June 2003, the WinGIS Policy Committee approved a four-tiered membership structure designed to encourage additional jurisdictions and organizations to join the consortium through affordable membership rates.

## MEMBERSHIP BENEFITS

Each membership type has specific benefits including discounting pricing on WinGIS staff services and training plus access to a wide variety of data layers and information. Through the GIS, members have the capability to create custom maps and reports for analysis using the most current data available. Members' access to the WinGIS Intranet site also provides partner agencies with the ability to quickly access online custom interactive maps and scans of all plat documents housed in the Winnebago County Recorder's Office.

## DATA LAYERS INCLUDE BUT ARE NOT LIMITED TO:

- Orthophotos - 6 inch per pixel
- Contours & Spot Elevation - 2 ft. contours
- Street Network
- Parcels
- Cities, Towns & Villages
- Townships
- County Outline
- Railroads
- Flood Zones
- Hydrographic Centerlines
- Soils
- 2000 Census Data
- Geological Data

Please visit us online for a complete listing of data layers available.
